

**February 13, 2013, Video Conference Advance Questions
(Oregon Coast Community College)**

For each of the following please provide information you would like to share with colleagues at other Oregon DQP institutions. We ask that by February 6, 2013, you email your responses as an attachment to DanskineM@lanecc.edu. Shortly thereafter all responses will be available for public viewing on the DQP website (<https://oregondqp.lanecc.edu/>) in the "Conferences" section of the "About the DQP Project" page.

1. Although the DQP work is still in its early stages, describe progress you may have made in clarifying, refining, or implementing your Work Plan?

Progress is slow. We have yet to start using the spider web. Our National Visiting Committee for the Aquarium Science Program is in town this week. The DQP will be introduced to them in addition to their regular annual program review.

2. How has the work to date with the DQP informed your thinking on the identification and alignment of learning outcomes and assessment of student achievement of those outcomes?

Learning Objectives have become a theme at this year's OCCC Council for Curriculum and Instruction meetings. The DQP work done in the Aquarium Science Program will be shared with this larger group later in the spring.

3. What focus/activities for the May conference would be most helpful in working through your Work Plan?

Seeing how other colleges are using the DQP as part of program assessment and improvement.
