- A structured strategy is conducive to the Win-Win process and strategies
- Institutional plan should include:
 - Who the key players will be – align individuals working on similar projects
 - Time devoted – allot sufficient time for participants based on Win-Win goals and expectations

WHAT WE LEARNED

- Aligning individuals can allow for clear and consistent goals

- Allowing sufficient time will show commitment to Win-Win

POSITIVE OUTCOMES AND PERCEPTIONS

- While working on and discussing the Win-Win Initiative across campus we **did not run into any faculty or staff who objected to the retroactive award of degrees**
- **Many have agreed with the benefit that this initiative can bring not only to the institution and our completion rate but also to the student**
